ADITI GUPTA

Data & Delivery Leader | Modernization · Data Strategy · Quality | Healthcare & Regulated Industries

aditiguptadatai@gmail.com | Austin, TX | linkedin.com/in/aditi-gupta-tpm/

EXECUTIVE PROFILE

Healthcare data architecture and delivery leader with 20+ years of technology consulting experience, including 12+ years specializing in Medicaid enterprise systems and State agency programs. Proven record architecting and leading large-scale healthcare data solutions spanning T-MSIS, MMIS, Managed Care analytics, semantic data layers, ETL/data warehouses, and mainframe-to-cloud modernization. Combines healthcare domain depth, data architecture, regulatory compliance, and cross-functional leadership to translate complex operational needs into scalable, governed data solutions. Experienced leading multi-vendor teams and engaging State, business, technology, and federal stakeholders.

CORE LEADERSHIP & ARCHITECTURE CAPABILITIES

Healthcare Data Architecture | Medicaid / Managed Care | Enterprise Data Integration & ETL | Semantic & Analytical Data Modeling | Cloud & Legacy Modernization | Data Quality & Federal Compliance | Stakeholder & Vendor Leadership | Healthcare Operations & Reporting | SQL & BI / Analytics | Program & Delivery Leadership

PROFESSIONAL EXPERIENCE

Accenture — Austin, TX **2013 – Present**

Test Lead & QA Manager — Medicaid Mainframe-to-Azure Modernization **Mar 2026 – Present**

Client: State Medicaid Agency

- Leading a team supporting a multi-year, multi-million-dollar modernization of Medicaid systems from mainframe technologies to Azure in partnership with Ensono and Microsoft.
- Direct end-to-end integration, regression, functional, and UAT strategy; align test data, readiness gates, defect triage, and delivery milestones across agency and technology stakeholders.
- Apply deep Medicaid domain expertise to validate business-logic and data fidelity across beneficiary eligibility, claims, and enrollment processes during migration.
- People lead for testers: coaching and development; hiring contractors and conducting performance reviews for data engineers. **Jul 2025 – Feb 2026**

Semantic Layer Architect — Managed Care Insights

Client: State Medicaid Agency

- Spearheaded architecture and development of a unified semantic data layer consolidating Managed Care Organization reporting and enabling streamlined State review and approval workflows.
- Designed analytics that cross-referenced MMIS data with MCO-submitted reports to identify discrepancies and provide actionable insights for agency decision-making.
- Translated complex Medicaid managed-care rules into data models, KPIs, and reporting specifications, establishing a consistent source of truth across multiple MCOs.
- Partnered with business and IT stakeholders to validate data logic and iterate on solution design, reducing manual reconciliation and improving oversight quality.

Data Analytics & Reporting Architect — Medicaid Analytics **Apr 2023 – Jun 2025**

Client: State Medicaid Agency

- Led data analytics for the Medicaid COVID Unwind initiative, delivering enrollment-trend and renewal reporting adopted by statewide program and operational leadership.
- Engineered a Pentaho ETL pipeline integrating monthly member demographic data into Power BI dashboards for operational decision support.
- Automated recurring HIV/AIDS expense analysis, reducing a manual monthly reporting process to near real-time analysis.

Associate Project Manager / Data Integration Architect — T-MSIS Modernization **Jan 2019 – Mar 2023**

Client: State Health & Human Services Agency

- Architected and managed a T-MSIS ETL data warehouse processing approximately 500M records monthly for federal reporting, maintaining zero downtime through the delivery lifecycle.
- Improved State T-MSIS data quality from red to yellow status against Federal OBA through data-quality remediation with Product Owners and federal liaisons.
- Led migration of 9 complex ETL processes comprising 25 modules from legacy systems to Oracle in six months, positioning the application for modernization.
- Delivered an 80% ETL performance improvement by coordinating architecture and infrastructure changes across technical and administration teams.
- Built and managed a cross-functional delivery team of Informatica developers and SAP Data Services engineers.

Solution Architect — Long-Term Care Medicaid Systems **Jul 2013 – Jan 2019**

Client: State Health & Human Services Agency

- Served as Product Owner liaison, lead analyst, and Medicaid SME for PASRR/LTC federal-compliance initiatives totaling 7,000 hours; co-led two major projects within one year.
- Defined end-to-end workflows for medical-necessity authorization of nursing-facility specialized services, eliminating manual workarounds and improving timely access for Medicaid recipients.
- Developed an automated regression suite that reduced project effort by 20% and established knowledge-transfer practices that accelerated team onboarding.

Infosys — Hartford, CT & Mysore, India **1999 – 2011**

Project Manager & Team Lead — Healthcare & Insurance Vertical **1999 – 2011**

- Led planning, budgeting, delivery management, and onsite/offshore teams for Aetna healthcare programs spanning claims, pricing, and HSA solutions, as well as Allstate engagements.
- Pioneered strategic offshoring of business-analysis functions for Aetna, generating $1M+ in incremental annual revenue for the practice.
- Established a Test Center of Excellence for Allstate, standardizing test governance and automation; recognized with the Infosys Best Initiative Award.
- Drove delivery-process improvements that achieved CMMI Level 5 performance within one year of project kickoff.

TECHNOLOGY & HEALTHCARE DOMAIN

Data & Analytics: SQL, Python, Power BI, Cognos, Pentaho ETL, Informatica, SAP BusinessObjects / Data Services

Cloud & Platforms: Azure, Oracle, GitHub, GitHub Copilot

Healthcare / Medicaid: MMIS, T-MSIS, Medicaid Enrollment, Claims Processing, Managed Care Reporting, LTC / PASRR, State & Federal Compliance

Delivery & Collaboration: Agile / Scrum, JIRA, ServiceNow, MS Project, UAT / Test Management, Stakeholder & Vendor Management

EDUCATION & CERTIFICATIONS

- B.E. (Honors), National Institute of Technology — Rourkela, India
- Data Strategy — UC Berkeley, Nov 2025
- Microsoft Certified: Azure Fundamentals
- AI/ML — Linear Regression, UT Austin
- AICPCU General & Personal Insurance (INS 21 & 22) | Infosys Project Management Elite
